METAL PROGRESS

THE MAGAZINE OF MATERIALS AND PROCESS ENGINEERING

Volume 89

January 1966 through June 1966

Subject Index

Aerospace
Materials for Space Stations, by John B. Rittenhouse and John B. Singletary 2-56

Aging
Quench Aging . . . A New Heat Treatment for Precipitation Hardening Aluminum Alloys, by Jacob Katz 2-70

Alloy steels
Cooling Transformation Diagram for AISI 5160 .....1-94; *(ds)* 1-96
Manufacturing a Nuclear Reactor Vessel, by John A. George 4-56
Should Pressure Vessels Be Heat Treated?, by Roy E. Lorentz, Jr. 4-66
Sulfur in Low Alloy Steels, by A. G. Franklin and W. J. McG. Tegart *(d)* 6-194

Aluminum
Aluminum Welding Today, by Neale E. Orrok 5-91
Cold Extrude Rapidly to Produce Long, Thin-Wall Aluminum Tubes, by Robert B. Pond 6-77
How Dislocations Affect Stress Corrosion Cracking in Aluminum Alloys, by Alvin J. Jacobs 5-80
Materials and Fabricating Methods for the Apollo Spacecraft, by L. E. Gatzek, R. P. Olsen, L. J. Korb and H. M. Clancy 2-64
Properties of Powdered Aluminum Parts, by R. J. Towner *(d)* 6-182
Quench Aging . . . A New Heat Treatment for Precipitation Hardening Aluminum Alloys, by Jacob Katz 2-70
Technology Forecast '66 1-58

Amorphous metals
Working With Amorphous Metals, by Siegfried Mader *(d)* 4-186

Anisotropy
Anisotropy in Ausformed Steels, by R. H. Bush, A. J. McEvily, Jr. and W. M. Justusson *(d)* 2-146

Anodes
Lead Anodes for Cathodic Protection, by S. Tudor and A. Ticker *(d)* 6-180

Atomic energy
Progress in Nuclear Electricity, by Allen G. Gray *(cp)* 4-55

Ausformed steels
Anisotropy in Ausformed Steels, by R. H. Bush, A. J. McEvily, Jr. and W. M. Justusson *(d)* 2-146
Ausformed Steels in Automotive Applications, by Robert Clark and Julius J. Harwood 3-81

Ausforming
Research Reveals Potential of Ausforming by Forging *(tn)* 1-9
Tensile Tests of Ausformed Steels, by W. W. Gerberich, C. F. Martin and V. F. Zackay *(d)* 1-152

Austenite
Determining Retained Austenite, by R. L. Miller *(d)* 3-183
Stabilizing Austenite, by W. C. Leslie and R. L. Miller *(d)* 3-179

Automobile bodies
Vacuum Forming of ABS Auto Bodies 3-137

Automobile parts
Ausformed Steels in Automotive Applications, by Robert Clark and Julius J. Harwood 3-81
Phosphate and Oil Treatment Protects Automotive Parts, by Neale E. Orrok *(d)* 5-150
Sintered Metal in Future Automobiles, by Robert Talmage 2-119

Bearings
Choosing Bronze Alloys for Structural Bearings, by Thomas E. Fearnside 6-63
Self-Lubricating Bearing Materials, by D. J. Boes and P. H. Bowen *(d)* 6-171

Biographies
Stewart G. Fletcher . . . ASM President for 1965-66, by Clarence T. Fletcher 6-80

Bonding, diffusion
Technology Forecast '66 1-67

Brasses
Hard Spots in Brasses, by D. C. Stock and W. J. Smellie *(d)* 4-174
How Silicon and Boron Affect Brasses by D. A. Hudson *(d)* 5-167
"Piercing" Makes Brass Parts Economically, by George Harrison and Nelson Harrison 4-76

Brazing
MP Production Guide . . . Techniques for Welding and Brazing Galvanized Steel, by Eldon Brandon 6-91
Salt Bath Bonding Process Joins Dissimilar Metals *(tn)* 1-7
Strong Copper-Brazed Joints Bond Steel Components, by William D. Kehr 1-90

Bronzes
Choosing Bronze Alloys for Structural Bearings, by Thomas E. Fearnside 6-63

Carburizing
Zone Carburizing Gives Close Carbon Control in Gears, by Robert L. Hughes, Harrold J. Bates and Orville E. Cullen .. 1-85

Cast iron
Compliance With Specifications for Ductile Iron Castings Assures Quality, by Harvey E. Henderson 5-82
A Shrinkage Test for Gray Iron, by John F. Wallace *(d)* 5-154
Specifications and Properties of Ductile (Nodular) Iron Castings 5-88
Technology Forecast '66 1-58
Tin in Cast Iron, by G. N. J. Gilbert *(d)* 5-180
Titanium in Cast Iron, by Albert De Sy *(d)* 5-170

Castings
Technology Forecast '66 1-58

Chemical processing equipment
Copper Clad Steel: An Economical Material for Chemical Processing Vessels, by William H. Gorman, Jr. and Albert Hoersch, Jr. 4-91

Chromium
New Chromium Compound Facilitates Automatic Plating *(sr)* 2-99

Clad metals
Ways To Join Precoated Metals (Staff Report) 4-119

Coating
Technology Forecast '66 1-69

Cold extrusion
Cold Extrude Rapidly to Produce Long, Thin-Wall Aluminum Tubes, by Robert B. Pond 6-77

Columbium alloys
Controlling Contamination in Refractory Metal Welds, by Ernest G. Thompson 4-106
Refractory Alloy Tubing for Space Power Systems, by R. William Buckman, Jr., and John L. Godshall 3-105

Computers
Metallurgy in Computer Development, by Harvey D. Ross 5-75

Continuous casting
Semicontinuous Casting of Nonferrous Metals, by G. Trapied *(d)* 5-175

Controlled atmospheres
Generating Atmospheres for Steel Processes, by Ewald Spielberger 5-127
Modern Controls for Atmosphere Heat Treating
. . . Characteristics and Applications (A Furnace Makers' Forum) 5-60
. . . Innovations Aid Production, by Hugh F. Coyle 5-56
. . . A User Compares Infrared and Carbon-Resistance Units, by Harold S. Rickert 5-67
. . . Using Dew Point and Infrared Systems, by Norbert K. Koebel 5-70

Cooling curves
Cooling Transformation Diagram for AISI 5160 .....1-94; *(ds)* 1-96

Copper
A Dispersion Hardened Copper for Electrical Uses, by Allen S. McDonald 4-70
Internally Oxidized Coppers, by M. F. Ashby and G. C. Smith *(d)* 2-160
Stanford's Two-Mile Waveguide . . . A 400-Ton Copper Vacuum Tube, by Howard A. Blank 3-111
Strong Copper-Brazed Joints Bond Steel Components, by William D. Kehr 1-90
Technology Forecast '66 1-60

Corrosion resistance
A Corrosion Resistant Coating for Steel, by John M. Roblin 2-115

Cutting tools
Positive Rake Cutting Tools Machine Ductile Materials *(tn)* 2-7
Production Uses for Abrasive Cutoff Wheels, by John Mueller and Ernest J. Schillinger 4-79

Deep drawing
Polyethylene Films as Lubricants, by A. Ovreset and J. L. Duncan *(d)* 3-181
Rough Surfaces and Deep Drawing, by S. Fukui, K. Yoshida, K. Abe and K. Ozaki *(d)* 2-156

Eddy current tests
Eddy Currents Rate Carburized Parts, by Arthur Zavarella 6-60

Editorial
Government in Industry . . . How Far Can We Go?, by Allen G. Gray *(cp)* 5-55
The Management of New Products, by Allen G. Gray *(cp)* 3-55
Progress in Nuclear Electricity, by Allen G. Gray *(cp)* 4-55
Technological Benefits From Space, by Allen G. Gray *(cp)* 2-55
Technology Sets the Pace for 1966 and Beyond, by Allen G. Gray *(cp)* 1-71
We Must Remain Creative, by Frederic O. Hess *(cp)* 6-55

Electron beam welding
Electron Beam Welding in Atmosphere, by J. W. Meier *(d)* 4-185

***(cp)* Critical Point; *(d)* Digest; *(ds)* Data Sheet; *(sr)* Short Runs; *(tn)* Technical News**

Electrophoretic plating
"Paint Plating" in Practice, by Lester L. Spiller *(d)* 3-156
Coating Steel by Electrophoretic Deposition, by A. E. Jackson *(d)* 6-196

Electroplating
New Chromium Compound Facilitates Automatic Plating *(sr)* 2-99

Embrittlement
Hydrogen Embrittlement in Plating, by W. Dingley and J. Bednar *(d)* 6-174

Etching
Regenerating Ferric Sulfate Etch Baths, by William H. Parker 5-133

Explosive cladding
Technology Forecast '66 1-68

Explosive forming
Explosive Forming of Heavy-Wall Forgings, by Michael W. Helwig and Paul A. Archibald 3-65

Extrusion
Refractory Alloy Tubing for Space Power Systems, by R. William Buckman, Jr., and John L. Godshall 3-105

Forgings
Assuring Quality Forgings by Nondestructive Testing, by Richard G. Horner 3-70
Explosive Forming of Heavy-Wall Forgings, by Michael W. Helwig and Paul A. Archibald 3-65
How Forgings are Used Today, by Neale E. Orrok 3-56

Forming
Vacuum Forming of ABS Auto Bodies 3-137

Fracture
How Components Fail . . .
IV—Characteristics of Fatigue Fractures, by Donald J. Wulpi 1-79
V—Surface Damage . . . Effect of Wear and Fatigue, by Donald J. Wulpi 3-98
VI—Surface Damage . . . Effects of Corrosion, by Donald J. Wulpi 4-94
VII—Bending and Tensile Failures in Shafts, by Donald J. Wulpi 5-102
VIII—Torsional Failures in Shafts, by Donald J. Wulpi 6-82

Free-machining steels
Improving Machinability of Free-Cutting Steels, by J. Clark McManus 6-68

Galvanized steel
MP Production Guide . . . Techniques for Welding and Brazing Galvanized Steel, by Eldon Brandon 6-91

Gas turbines
Practical Gas Turbines for Trucks Await New Materials Technology *(tn)* 3-7

Gears
Are Soft Cores Necessary in Case-Hardened Gears?, by Harry B. Knowlton 1-76
Zone Carburizing Gives Close Carbon Control in Gears, by Robert L. Hughes, Harrold J. Bates and Orville E. Cullen 1-85

Grinding wheels
Production Uses for Abrasive Cutoff Wheels, by John Mueller and Ernest J. Schillinger 4-79

Hardening, case
Are Soft Cores Necessary in Case-Hardened Gears?, by Harry B. Knowlton 1-76

Hardness specifications
Why Not Specify the Hardenability of Carbon Steels by Calculation?, by Arthur H. Smith 6-56

Heating elements
Heating Elements in Portable Hair Dryers *(sr)* 4-105

Heat resistant alloys
Form Rolling Trims the Cost of Jet Engine Parts, by Robert V. Nasman and Ernest E. Grider 2-77
Technology Forecast '66 1-61

Heat treating furnaces
Stanford's Two-Mile Waveguide . . . Retort Furnace Anneals and Brazes 266,000 Components, by Arnold L. Eldredge 3-117

Heat treatment
Aus-Bay Quenching: High Strength Without Distortion, by Gordon L. Peterman 2-73
Generating Atmospheres for Steel Processes, by Ewald Spielberger 5-127
Heat Treating Precise Components, by Robert E. Schafer 3-73
How to Heat Treat Ti-8Al-1Mo-1V, by Donald B. Warmuth and Harold D. Kessler 3-91
Improving High-Strength Low-Alloy Steels Through Controlled Cooling, by Eric R. Morgan, Terence E. Dancy and Michael Korchynsky 1-125
Modern Controls for Atmosphere Heat Treating
. . . Characteristics and Applications (a Furnace Makers' Forum) 5-60
. . . Innovations Aid Production, by Hugh F. Coyle 5-56
. . . A User Compares Infrared and Carbon-Resistance Units, by Harold S. Rickert 5-67
. . . Using Dew Point and Infrared Systems, by Norbert K. Koebel 5-70
Quench Aging . . . A New Heat Treatment for Precipitation Hardening Aluminum Alloys, by Jacob Katz 2-70
Rating Quenching Fluids, by Philip E. Cary 2-90
Technology Forecast '66 1-66

High strength steels
How Changes in Composition and Processing Affect HSLA Steels, by George F. Melloy 4-129
Improving High-Strength Low-Alloy Steels Through Controlled Cooling, by Eric R. Morgan, Terence E. Dancy and Michael Korchynsky 1-125
The Merchant Ship in High Strength Steel, by John P. Fitzgerald 2-100
Properties of HSLA Steels, by J. H. Bucher and J. D. Grozier *(d)* 2-154
Welding High Strength Pipeline Steels, by Armand G. Barkow 4-98
Welds in Ultrahigh Strength Steel, by E. F. Nippes and E. W. Emmerich *(d)* 5-165

Hopkins Process
Hopkins Process Casts Its First Slab . . . A 1350 Lb Ingot of A286 *(tn)* 3-7

Induction brazing
Tube Assemblies Joined by Vacuum Induction Brazing, by Shelton Watkins, Jr. 4-73

Inspection
Eddy Currents Rate Carburized Parts, by Arthur Zavarella 6-60
Technology Forecast '66 1-69

Investment castings
Investment Cast 17-4PH Flies With the French Crusader, by Rex D. Eberly 6-72

Iron alloys
Heating Elements in Portable Hair Dryers *(sr)* 4-105

Iron powder metals
Carbonyl Iron Powder Looks to New Applications, by Arnold R. Poster, ... 1-106
Properties of Sintered Alloys, by Sherwood W. McGee and Eugene R. Andreotti *(ds)* 4-88
Sintered Metal in Future Automobiles, by Robert Talmage 2-119
Sintered Metals in Engineering Design, by Eugene R. Andreotti and Sherwood W. McGee 4-82

Joining
Joining Dissimilar Metals, by Neale E. Orrok *(d)* 2-139
Technology Forecast '66 1-67

Lasers
Laser Features and Applications, by Amitabha Bhattacharyya *(d)* 1-166

Lead
Technology Forecast '66 1-60

Lubricants
How to Choose a Lubricant for Stamping Steel Parts, by Ferdinand L. Ewald 1-72
How the Automotive Industry Uses Solid Lubricants, by James T. McCabe 5-109
Industrial Uses for Solid Lubricants, by Lowell C. Horwedel 4-111
Lubricating Parts in Spacecraft, by Charles E. Vest *(d)* 5-158
Polyethylene Films as Lubricants, by A. Ovreset and J. L. Duncan *(d)* 3-181
Self-Lubricating Bearing Materials, by D. J. Boes and P. H. Bowen *(d)* 6-171

Machining
Electrical Machining Methods, by E. J. Krabacher, W. A. Haggerty, C. R. Allison and M. F. Davis *(d)* 5-172
Improving Machinability of Free-Cutting Steels, by J. Clark McManus 6-68
Machining Difficult Materials . . . Molybdenum Alloys, by Michael Field, Norman Zlatin and Robert T. Jameson 2-84
Recommended Practices for Machining TZM and Mo-0.5Ti Alloys *(ds)* 2-88
Technology Forecast '66 1-68

Magnesium
Technology Forecast '66 1-58

Magnetism
The Nature of Magnetism, by Thomas Erber *(d)* 4-178

Melting
Hopkins Process Casts Its First Slab . . . A 1350 Lb Ingot of A286 *(tn)* 3-7

Metallography
Metallographic Techniques for Materials Subjected to Re-Entry Conditions, by William J. Ladroga, Jr. 2-127
Three-Dimensional Metallography, by William C. Coons and Arthur R. Hansen 3-95
The World of Fine Metallography 1-97

Molybdenum alloys
Machining Difficult Materials . . . Molybdenum Alloys, by Michael Field, Norman Zlatin and Robert T. Jameson 2-84
Recommended Practices for Machining TZM and Mo-0.5Ti Alloys *(ds)* 2-88

Nickel alloys
Materials and Fabricating Methods for the Apollo Spacecraft, by L. E. Gatzek, R. P. Olsen, L. J. Korb and H. M. Clancy 2-64
Surface Effects of Metal Removal, by P. L. Worthington *(d)* 3-179
Tube Assemblies Joined by Vacuum Induction Brazing, by Shelton Watkins, Jr. 4-73

Nondestructive testing
Assuring Quality Forgings by Nondestructive Testing, by Richard G. Horner 3-70
Eddy Currents Rate Carburized Parts, by Arthur Zavarella 6-60
Nondestructive Testing by Magnetic Analysis, by Robert C. McMaster *(d)* 3-183
Nondestructive Testing With Heat, by D. R. Maley and W. R. Apple *(d)* 3-181

Nonmetallic materials
Technology Forecast '66 1-63

Nuclear reactors
Manufacturing a Nuclear Reactor Vessel, by John A. George 4-56

Painting
"Paint Plating" in Practice, by Lester L. Spiller *(d)* 3-156

Pickling
Regenerating Ferric Sulfate Etch Baths, by William H. Parker 5-133

Piercing
"Piercing" Makes Brass Parts Economically, by George Harrison and Nelson Harrison 4-76

Pipeline
Welding High Strength Pipeline Steels, by Armand G. Barkow 4-98

Plasma arc process
Plasma Needle Arc Process Joins Metal Foils Up to 1/32 In. Thick *(tn)* 5-7

Plastics
A Cross Section of Structural Uses for Reinforced Plastics 6-105
Polyethylene Films as Lubricants, by A. Ovreset and J. L. Duncan *(d)* 3-181
Technology Forecast '66 1-62
Vacuum Forming of ABS Auto Bodies 3-137

Plating
Technology Forecast '66 1-69

Platinum alloys
Magnetic Platinum, by L. A. Ford *(d)* 3-168
Platinum in Fuel Cells, by H. G. Oswin *(d)* 6-186

Porcelain enameling
Porcelain Enameling . . . the One-Coat Process (Staff Report) 5-97

Powder metallurgy
Carbonyl Iron Powder Looks to New Applications, by Arnold R. Poster 1-106

***(cp)* Critical Point; *(d)* Digest; *(ds)* Data Sheet; *(sr)* Short Runs; *(tn)* Technical News**

A New Way to Make Titanium Alloys and Composites, by Stanley Abkowitz.... 4-62
Properties of Sintered Alloys, by Sherwood W. McGee and Eugene R. Andreotti *(ds)* 4-88
Sintered Metal in Future Automobiles, by Robert Talmage 2-119
Sintered Metals in Engineering Design, by Eugene R. Andreotti and Sherwood W. McGee 4-82
Technology Forecast '66 1-64

Pressure vessels
Manufacturing a Nuclear Reactor Vessel, by John A. George 4-56
Should Pressure Vessels Be Heat Treated?, by Roy E. Lorentz, Jr. 4-66

Quench aging
Quench Aging . . . A New Heat Treatment for Precipitation Hardening Aluminum Alloys, by Jacob Katz 2-70

Quenching
Aus-Bay Quenching: High Strength Without Distortion, by Gordon L. Peterman 2-73
Rating Quenching Fluids, by Philip E. Cary 2-90
Quenching 12% Cr Steels, by B. R. Banerjee, J. M. Capenos and J. J. Hauser *(d)* 1-152

Radiography
Determining Coating Stresses by X-Ray, by Glen W. Bush and Harold J. Read *(d)* 6-188
25 Mev X-Ray Unit Examines Steel Up to 20 In. Thick *(tn)* 3-8

Refractories
Progress in Refractories . . .
Research Aids Producers, by Raymond E. Birch 6-122
Makers Supply Many Products, by Grant M. Farrington and John F. Burst 6-123
Lining Basic Oxygen Furnaces, by Harvey N. Barrett, Jr. 6-126
High Hot Strength Needed in Rotating Oxygen Furnaces, by Robert P. Ross 6-127
Durable Linings Extend Melting Campaigns, by R. F. Whitford 6-127
Stronger Bricks from Synthetic Mullite, by Harold D. Prior 6-128
Pitch Bonding, Insulating and Gunning, by J. A. Crookston 6-132
Special Products Aid Steelmakers, by C. L. Norton 6-132
Induction Melting and Heat Treating, by Ronald K. Bart and Ronald A. Stark 6-134
High Purity Materials Widely Applied, by Philip A. Gaebe 6-136
Alumina and Zirconia for Efficient Production, by Frank C. Steimke 6-137
Ceramic Oxides Serve to 4000 F, by Don W. Bissell 6-138
Special Uses for Carbon and Graphite, by William B. Arnold 6-141
Carbon and Graphite for Melting Processes, by Loren E. Bacon 6-139
Silicon Carbide and Sintered Alumina, by Clifton Tinkham 6-143

Refractory metals
Controlling Contamination in Refractory Metal Welds, by Ernest G. Thompson.... 4-106
Refractory Alloy Tubing for Space Power Systems, by R. William Buckman, Jr., and John L. Godshall 3-105
Technology Forecast '66 1-61

Retorts
Stanford's Two-Mile Waveguide . . . Retort Furnace Anneals and Brazes 266,000 Components, by Arnold L. Eldredge 3-117

Rolling
Form Rolling Trims the Cost of Jet Engine Parts, by Robert V. Nasman and Ernest E. Grider 2-77

Sheet
A Corrosion Resistant Coating for Steel, by John M. Roblin 2-115
Temper Rolling and Dislocations, by A. J. Goldman *(d)* 2-152
Ways To Join Precoated Metals (Staff Report) 4-119

Ships
The Merchant Ship in High Strength Steel, by John P. Fitzgerald 2-100

Spacecraft
Lubricating Parts in Spacecraft, by Charles E. Vest *(d)* 5-158
Materials and Fabricating Methods for the Apollo Spacecraft, by L. E. Gatzek, R. P. Olsen, L. J. Korb and H. M. Clancy 2-64
Materials for Space Stations, by John B. Rittenhouse and John B. Singletary 2-56

Specifications
Compliance With Specifications for Ductile Iron Castings Assures Quality, by Harvey E. Henderson 5-82
Specifications and Properties of Ductile (Nodular) Iron Castings 5-88

Stainless steels
Hydrogen Embrittlement in Type 410, by J. P. Bressanelli *(d)* 2-172
Investment Cast 17-4 PH Flies With the French Crusader, by Rex D. Eberly 6-72
Materials and Fabricating Methods for the Apollo Spacecraft, by L. E. Gatzek, R. P. Olsen, L. J. Korb and H. M. Clancy 2-64
Properties of Sintered Alloys, by Sherwood W. McGee and Eugene R. Andreotti *(ds)* 4-88
Sintered Metals in Engineering Design, by Eugene R. Andreotti and Sherwood W. McGee 4-82
Stainless Steel Mandrels Size Big Forged Rings *(sr)* 5-106
Tube Assemblies Joined by Vacuum Induction Brazing, by Shelton Watkins, Jr. 4-73

Stamping
How to Choose a Lubricant for Stamping Steel Parts, by Ferdinand L. Ewald 1-72

Steel
Anisotropy in Ausformed Steels, by R. H. Bush, A. J. McEvily, Jr. and W. M. Justusson *(d)* 2-146
Aus-Bay Quenching: High Strength Without Distortion, by Gordon L. Peterman 2-73
Ausformed Steels in Automotive Applications, by Robert Clark and Julius J. Harwood 3-81
Copper Clad Steel: An Economical Material for Chemical Processing Vessels, by William H. Gorman, Jr. and Albert Hoersch, Jr. 4-91
A Corrosion Resistant Coating for Steel, by John M. Roblin 2-115
Explosive Forming of Heavy-Wall Forgings, by Michael W. Helwig and Paul A. Archibald 3-65
Generating Atmospheres for Steel Processes, by Ewald Spielberger 5-127
Hot Rolling of Steel, by R. A. Bosch and A. F. de Retana *(d)* 3-181
How Some Variables Affect Impact Strength of Steel, by F. W. Boulger and W. R. Hansen *(d)* 3-170
How to Choose a Lubricant for Stamping Steel Parts, by Ferdinand L. Ewald 1-72
Porcelain Enameling . . . the One-Coat Process, (Staff Report) 5-97
Properties of Sintered Alloys, by Sherwood W. McGee and Eugene R. Andreotti *(ds)* 4-88
Quenching 12% Cr Steels, by B. R. Banerjee, J. M. Capenos and J. J. Hauser *(d)* 1-152
Sintered Metal in Future Automobiles, by Robert Talmage 2-119
Sintered Metals in Engineering Design, by Eugene R. Andreotti and Sherwood W. McGee 4-82
Steel Without Sulfur . . . A Talk With Norman Goss 3-129
Strong Copper-Brazed Joints Bond Steel Components, by William D. Kehr 1-90
Technology Forecast '66 1-55
Temper Rolling and Dislocations, by A. J. Goldman *(d)* 2-152
Tensile Tests of Ausformed Steels, by W. W. Gerberich, C. F. Martin and V. F. Zackay *(d)* 1-152
Ways To Join Precoated Metals (Staff Report) 4-119
Welding High Strength Pipeline Steels, by Armand G. Barkow 4-98
Why Not Specify the Hardenability of Carbon Steels by Calculation?, by Arthur H. Smith 6-56

Strain gages
Strain Gages at High Pressure, by R. V. Milligan *(d)* 6-175

Stress corrosion
How Dislocations Affect Stress Corrosion Cracking in Aluminum Alloys, by Alvin J. Jacobs 5-80
Stress Corrosion in Titanium Alloys, by David N. Braski and George J. Heimerl *(d)* 1-150

Structural steels
Designing Strong Constructional Steels, by Allan M. Rathbone, L. P. Connor and J. H. Gross *(d)* 3-174

Tantalum
Controlling Contamination in Refractory Metal Welds, by Ernest G. Thompson.... 4-106
Refractory Alloy Tubing for Space Power Systems, by R. William Buckman, Jr., and John L. Godshall 3-105
Working With Tantalum, by Robert E. Droegkamp 4-133

Technology Forecast
Technology Forecast '66 1-55

Testing
Technology Forecast '66 1-69

Thermocouples
How Bare Wire and Sheathed Thermocouples Compare, by Erich G. Weissenberger 2-93

Titanium alloys
Ascertaining the Hardenability of a Titanium Alloy, by L. D. Jaffe, E. Gordon and F. W. Cotter *(d)* 6-190
Contamination-Free Process Produces Titanium Castings up to 25 lb. *(tn)* 2-8
How to Heat Treat Ti-8Al-1Mo-1V, by Donald B. Warmuth and Harold D. Kessler 3-91
Materials and Fabricating Methods for the Apollo Spacecraft, by L. E. Gatzek, R. P. Olsen, L. J. Korb and H. M. Clancy 2-64
A New Way to Make Titanium Alloys and Composites, by Stanley Abkowitz.... 4-62
Stress Corrosion in Titanium Alloys, by David N. Braski and George J. Heimerl *(d)* 1-150
Technology Forecast '66 1-58
A Titanium Alloy for Use at Elevated Temperatures, by Victor J. Erdeman.... 2-80

Tool steels
A Tool Steel With Versatility, by Gary Steven and John G. McMullin 3-77

Tubing
Tube Assemblies Joined by Vacuum Induction Brazing, by Shelton Watkins, Jr. 4-73
Welded Tubing Cuts Brake Cylinder Costs, by John Kennison *(sr)* 1-105

Tungsten
Properties of Tungsten Crystals, by R. H. Schnitzel *(d)* 3-183

Ultrasonic testing
Monitoring Heat Treated Components With Ultrasonic Tests, by Bernard Ostrofsky and Norman B. Heckler 2-96

Vacuum forming
Vacuum Forming of ABS Auto Bodies 3-137

Waveguides
Stanford's Two-Mile Waveguide . . . A 400-Ton Copper Vacuum Tube, by Howard A. Blank 3-111
Retort Furnace Anneals and Brazes 266,000 Components, by Arnold L. Eldredge 3-117

Welding
Aluminum Welding Today, by Neale E. Orrok 5-91
Controlling Contamination in Refractory Metal Welds, by Ernest G. Thompson.... 4-106
High-Frequency Process Welds Side Rails for Car Frames *(tn)* 1-8
MP Production Guide . . . Techniques for Welding and Brazing Galvanized Steel, by Eldon Brandon 6-91
Technology Forecast '66 1-67
Welding . . . Its Influence on Material Selection, by Neale E. Orrok *(d)* 4-160

Welding electrodes
Low Carbon Steel Strip Basis of Stainless Welding Electrodes *(tn)* 3-8

Welds
Microsegregation in Welds, by Warren F. Savage and Carl D. Lundin *(d)* 3-179

Western Metal and Tool Conference
Aerospace Engineers Seek Improved Materials and Better Ways to Fabricate Them 4-9
1966 WESTEC Technical Program 2-10

Whiskers
Technology Forecast '66 1-63

Wire
Fast Wire Coating System Applies Colored, Corrosion-Resistant Film *(tn)* 1-8

Yield point
Hydrostatic Pressure and Yield Point, by F. P. Bullen, F. Henderson, M. M. Hutchinson and H. L. Wain *(d)* 6-179

Zinc
Technology Forecast '66 1-60

***(cp)* Critical Point; *(d)* Digest; *(ds)* Data Sheet; *(sr)* Short Runs; *(tn)* Technical News**

METAL PROGRESS

THE MAGAZINE OF MATERIALS AND PROCESS ENGINEERING

Volume 90

July 1966 through December 1966

Subject Index

Agricultural machinery
Economy in Painting 4-208

Alloy steels
Cooling Transformation Diagram for AISI 52100 ..... 3-86; *(d)* 3-88
Cooling Transformation Diagrams for AISI 1036 and 10B36 ..... 5-86; *(ds)* 5-88
Processing Low Alloy Steels, by A. W. Klisowski, E. A. Loria and C. A. Beiser *(d)* 5-152
Properties of 4130 Steel Tubes, by David L. Weigel 1-93

Alumina tools
Ceramic Cutting Tools . . . Present and Future 2-129

Aluminum
Aluminum Radiators—A Matter of Fabrication, by Paul B. Dickerson and W. Conrad Weltman, Jr. 4-195
Control of Residual Stresses in Hollow Aluminum Forgings, by Richard S. Barker and G. Keith Turnbull 5-60
Modern Practices for Finishing Aluminum . . . Anodizing and Sealing, Staff Report 6-68
Modern Practices for Finishing Aluminum . . . Cleaning and Brightening, Staff Report 5-96
Surface Treatments Extend Life of Stainless and Aluminum Auto Trim *(tn)* 1-9

Anodizing
Modern Practices for Finishing Aluminum . . . Anodizing and Sealing, Staff Report 6-68

Arc welding
Guide for Selecting Mild Steel Arc Welding Electrodes, by Jerome E. Hinkel ..... 1-82; *(ds)* 1-86
Welding . . . The Way to Hybrid Structures, by Robert L. Hickey and Robert W. Schultz 3-65
What You Can Do With Mechanized Arc Welding, by Neale E. Orrok 4-140

Atomic energy
The Atom in Space 6-92

Ausformed steels
Characteristics of Ausformed 12% Cr Steel, by G. T. Brown, A. J. Thomas and J. V. Hardy *(d)* 2-162
Strengthening Steels by Ausforming, by O. Johari and G. Thomas *(d)* 5-150
Using Ausformed Steels for Tools, by Yeshwant P. Telang and Robert Clark 2-87

Austempering
Austempering Seat Belt Hardware in Salt Baths *(sr)* 3-107

Automobiles
Ice . . . Snow . . . Salt . . . and Slag . . . How Stainless Steel Auto Trim Resists Corrosion, by Donald R. Zaremski 3-71
NDT Assures Quality of Auto Parts, by Donald W. Pontius 4-183
Progress in the Battle With Corrosion of Automobiles, by G. Fred Bush 6-56
What's in the Toronado, by Neale E. Orrok 3-56

Basic oxygen process
BOF + CC = High Production, by Carl R. Weymueller 5-119

Boron steels
How Caterpillar Uses Boron Steels, interview with Thomas H. Spencer 5-76
Retaining the Hardening Effect of Boron in Steels, by George F. Melloy and John C. Russ 5-82

Brass
Season Cracking in Alpha-Brass, by E. N. Pugh, W. G. Montague and A. R. C. Westwood *(d)* 5-170

Brazing
Brazing Molybdenum and Zircon Sensor Components, by Robert E. Curran and Lewis I. Mendelsohn 6-94
Copper Brazing Motorcycle Components of Carbon Steel, by A. Schneider 3-99

Carbides
Carbides With Machinability, by John L. Ellis and Stuart E. Tarkan 2-101
Percussion Welder Coats Tools With Carbides, by R. P. Wolgast and T. J. Crawford *(d)* 2-154

Carbide tools
Advances in Cemented Carbide Tooling, by Edward W. Goliber 2-95
Applications for Cemented Carbide Tools 2-98

Carbon steels
Calculating Strengths of Carbon Steels, by F. E. Pickering and T. Gladman *(d)* 3-174
At Caterpillar: Heat Treat Engineers Aim for Economy and Quality, by David S. Gould 4-163
Copper Brazing Motorcycle Components of Carbon Steel, by A. Schneider 3-99
Guide for Selecting Mild Steel Arc Welding Electrodes, by Jerome E. Hinkel ..... 1-83; *(ds)* 1-86
Powder Nickel Coating of Steel Shows Promise in Pilot Plant Stage *(tn)* 5-7
Recrystallization in Ferrous Metals, by W. C. Leslie, J. T. Michalak, A. S. Keh and R. J. Sober *(d)* 5-138

Carburizing
Carburizing Made Automatic, by Victor A. Aschenbrener 4-159

Case hardening
Why Case Hardened Components Fracture, by Lynn J. Ebert, Frank T. Krotine and Alexander R. Troiano 3-61

Cast iron
Heat Treatment . . . A Vital Factor in Machinability, by Norman Zlatin and John Christopher 2-105

Cast iron, nodular
Ductile Iron Castings Reduce Weight and Cost of Truck Suspension, by Alvin W. Singleton 4-213
How the Russians Make and Use Nodular Iron, by Arthur B. Tesman 3-111

Cemented carbide tools
Advances in Cemented Carbide Tooling, by Edward W. Goliber 2-95
Applications for Cemented Carbide Tools 2-98

Ceramic cutting tools
Ceramic Cutting Tools . . . Present and Future 2-129

Chromium
Chromium-Rich Case Slows Oxidation of Maraging Steel *(tn)* 2-8

Continuous annealing
Continuous Annealing of Copper Alloy Strip, by Walter D. France 3-129

Continuous casting
BOF + CC = High Production, by Carl R. Weymueller 5-119

Cooling curves
Cooling Transformation Diagram for AISI 52100 ..... 3-86; *(ds)* 3-88
Cooling Transformation Diagrams for AISI 1036 and 10B36 ..... 5-86; *(ds)* 5-88

Copper alloys
Continuous Annealing of Copper Alloy Strip, by Walter D. France 3-129
A Copper Alloy for Glass Molds, by Irving B. Elman 2-108

Corrosion resistance
How Uranium Affects Corrosion of Resulfurized Stainlesses, by Gregory J. Biefer and William M. Crawford 6-119
Ice . . . Snow . . . Salt . . . and Slag . . . How Stainless Steel Auto Trim Resists Corrosion, by Donald R. Zaremski 3-71
Progress in the Battle With Corrosion of Automobiles, by G. Fred Bush 6-56
Two Corrosion Resistant Steels From Japan, by Katsujiro Takehara, Masamichi Kowaka and Taishi Moroishi 5-111

Crankshafts
Heat Treating Crankshafts, by John A. Halgren and Philip E. Cary 5-56

Creep tests
Centrifugal Machine Speeds Creep Testing, by Perry L. Studt and Willis L. Clarke 5-72
Eleven Years of Creep Tests, by Alfred Keller 1-69

Cutting fluids
Employing Cutting Fluids, by A. W. Ackerman *(d)* 2-158
Selecting Cutting Fluids for Machining, by Ferdinand L. Ewald ..... 4-133; *(d)* 4-138

Cutting tools
Improving Cutting and Stamping Tools, by Harry G. Johnstin 2-64

Deep drawing
Correlating Deep Drawing Effects With Tensile Properties *(d)* 6-149

Defects
What to Look for in Spring Wire, by Ronald D. Crooks 6-89

Die casting
Improved Die Casting Process Available to All Industries *(tn)* 3-7
Progress in Die Casting, by R. P. Marchok and A. B. Draper; Leandro Luis and A. B. Draper; V. Panchanathan, M. R. Seshadri and A. Ramachandran *(d)* 3-153

Diemaking
New Diemaking System Helps Meet Tight Deadline by Walter Browne 2-93

Dies
Carbides With Machinability, by John L. Ellis and Stuart E. Tarkan 2-101
How Ford Uses Cast Forging Dies, by John C. Randall 4-146
What Ford Plans for . . . Numerically Controlled Die Machining, by George Pascoe 2-56
Urethane Die Helps Form Heavy Sheet, by Howard S. Achler 2-115

Diffusion coating
Chromium-Rich Case Slows Oxidation of Maraging Steel *(tn)* 2-8

Editorials
Challenge of the Future: Keeping Competitive, by Allen G. Gray *(cp)* 4-103
Failures: the Enlightened Viewpoint, by Allen G. Gray *(cp)* 3-55
The Fight With Corrosion, by Allen G. Gray *(cp)* 6-55
New Perspectives for Tooling, by Allen G. Gray *(cp)* 2-55
A Philosophy of Work, by Allen G. Gray *(cp)* 1-53
Which Valve to Turn, by Allen G. Gray *(cp)* 5-55

Electrocoating
Automaker: Electrocoating May Supplant Galvanized Steel and Zinc-Rich Primers *(tn)* 2-7

***(cp)* Critical Point; *(d)* Digest; *(ds)* Data Sheet; *(sr)* Short Runs; *(tn)* Technical News**

Electron beam welding
Partial Vacuum . . . the Key to Production Electron Beam Welding, by John W. Meier 1-63

Electronic equipment
Magnesium-Lithium Alloy Lightens Electronic Packaging, by Robert A. Monroe 1-89

Electroplating
The Best Electroplate for Zinc and Steel, by Charles L. Faust and William H. Safranek 4-154

Explosive forming
Forming Metals With High Energies, by Carl R. Weymueller 4-256

Fasteners
Fasteners for Cryogenic Applications, by Edward F. Gowen, Jr., and James J. Glackin 1-76

Fiber metal
Joining with Fiber Metal, by John F. Rudy *(d)* 1-134

Finishing
Modern Practices for Finishing Aluminum . . . Anodizing and Sealing, Staff Report 6-68
Modern Practices for Finishing Aluminum . . . Cleaning and Brightening, Staff Report 5-96

Forging
Forging and Solution Treating Alloy 718, by Donald M. Gadsby 6-85
Metal Flow in Steel Forgings, by John A. Schey, Francis A. Shunk and Paul W. Wallace 5-91
Resistance Heating Raises Forging Economy *(sr)* 1-100

Forging dies
How Ford Uses Cast Forging Dies, by John C. Randall 4-146

Forming
Expanded Metal Parts, by Ralph E. Roper *(d)* 2-174
Forming Metals With High Energies, by Carl R. Weymueller 4-256
Making Steel Pipe by Stretch Reduction, by Carl R. Weymueller 6-135

Fractures
How Components Fail—IX . . . Fracture of Gear Teeth, by Donald J. Wulpi 1-65
How Components Fail—X . . . Surface Damage in Gears, by Donald J. Wulpi 3-76
Why Case Hardened Components Fracture, by Lynn J. Ebert, Frank T. Krotine and Alexander R. Troiano 3-61

Free-machining iron
Free-Machining 1% Si Core Iron Solves Heat Treating Problems *(tn)* 2-9

Galvanized steel
Progress in the Battle With Corrosion of Automobiles, by G. Fred Bush 6-56

Gas turbines
Ford's New Truck Turbine: Still a Prototype *(tn)* 5-7

Gears
How Components Fail—IX . . . Fracture of Gear Teeth, by Donald J. Wulpi 1-65
How Components Fail—X . . . Surface, Damage in Gears, by Donald J. Wupi 3-76
Shot Peened Gears, by J. C. Straub *(d)* 3-180

Heat treatment
At Caterpillar: Heat Treat Engineers Aim for Economy and Quality, by David S. Gould 4-163
Forging and Solution Treating Alloy 718, by Donald M. Gadsby 6-85
Heat Treating Crankshafts, by John A. Halgren and Philip E. Cary 5-56
Heat Treatment . . . A Vital Factor in Machinability, by Norman Zlatin and John Christopher 2-105
A Salt Bath System for Making Spring Bars, by William A. Curtis 6-97

High energy rate forming
Forming Metals With High Energies, by Carl R. Weymueller 4-256

High strength steels
High Strength Steels for Magnetic Uses, by C. R. Honeycutt and E. A. Steigerwald *(d)* 5-144

Hydrogen embrittlement
Hydrogen Embrittlement in Springs, by James H. Maker 1-73
Preventing Embrittlement in Cadmium Plated Maraging Steel, by Edward A. Lauchner and Robert E. Herfert 3-84

Inclusions
Laser Microprobe Helps Identify Inclusions, by Joseph R. Ryan and Jack L. Cunningham 6-100

Iron
Evaluating Properties of Powder Iron Compacts by Sonic Tests, by Robert H. Brockelman 1-95
Recrystallization in Ferrous Metals, by W. C. Leslie, J. T. Michalak, A. S. Keh and R. J. Sober *(d)* 5-138

Iron alloys
Fasteners for Cryogenic Applications, by Edward F. Gowen, Jr., and James J. Glackin 1-76

Joining
Joining With Fiber Metal, by John F. Rudy *(d)* 1-134

Lasers
Electronic Lead Welding With the Laser, by Robert J. Frick 3-91
Laser Microprobe Helps Identify Inclusions, by Joseph R. Ryan and Jack L. Cunningham 6-100

Machining
Machining With Oxide Tooling, by Philip D. Arnold and Raymond D. Burns *(d)* ..2-148
Selecting Cutting Fluids for Machining, by Ferdinand L. Ewald ..... 4-133; *(ds)* 4-138
What Ford Plans for . . . Numerically Controlled Die Machining, by George Pascoe 2-56

Magnesium alloys
Magnesium-Lithium Alloy Lightens Electronic Packaging, by Robert A. Monroe 1-89

Management
Best Material Five Years Ago May Be Obsolete Today, by Wilson T. Groves 4-124
At Chrysler, Responsibility Extends to All Materials, to All Facets of Use, by Maurice F. Garwood 4-107
Coupling Is Done at the Start . . . Not at the End, by Louis P. Jahnke 4-106
Creation of Right Climate Promotes Exchange of Ideas, by G. Bruce Kiner 4-114
Depth of Quality Responsibility Reflects Role of Materials Engineering, by Dean K. Hanink 4-112
Designers Rely on Specialists for New Materials Know-How, by Abraham Hurlich 4-119
Good Materials Engineering Will Satisfy Customers, Yield Profits, by Oliver G. Saunders 4-115
How Engineers Contribute to Management, by Quentin W. Wiest 4-7
Judge Materials Engineering by Its Contribution to Profitability, by Newton N. Sacks 4-109
Materials Engineering Should Not Report to Any Group It Serves, by Elihu F. Bradley 4-120
Organization Stresses Interaction Between Science and Engineering, by John C. R. Kelly 4-127
Role of Materials Engineer Ranges From Scientist to Engineer, by Richard W. Hanzel 4-122
Sign-Off of Drawings Is Enforcement Function, by Robert P. Olsen 4-123
Success Hinges Largely on Capability of People, by Sam M. Jacobs 4-118
Try to Understand Problem, Then Solve It Only Once, by William L. Mitchell 4-116
We Must Keep Up With Advances and Take Advantage of Them Quickly, by Joseph A. Cameron 4-111
You Must Sell Your Services to All Plant Departments, by Mark G. Morris 4-126

Maraging steels
Manganese in Maraging Steels, by William R. Patterson and Lee S. Richardson *(d)* 5-136
Maraging Steel in Tooling Applications, by Daniel H. Yates and John C. Hamaker, Jr. 2-75
Preventing Hydrogen Embrittlement in Cadmium Plated Maraging Steel, by Edward A. Lauchner and Robert E. Herfert 3-84
Residual Elements in Maraging Steels, by C. J. Novak and L. M. Diran *(d)* 3-164

Materials Application Competition
ASM's 6th Annual Materials Application Competition 6-76

Materials engineering
Best Material Five Years Ago May Be Obsolete Today, by Wilson T. Groves 4-124
At Chrysler, Responsibility Extends to All Materials, to All Facets of Use, by Maurice F. Garwood 4-107
Coupling Is Done at the Start . . . Not at the End, by Louis P. Jahnke 4-106
Creation of Right Climate Promotes Exchange of Ideas, by G. Bruce Kiner 4-114
Depth of Quality Responsibility Reflects Role of Materials Engineering, by Dean K. Hanink 4-112
Designers Rely on Specialists for New Materials Know-How, by Abraham Hurlich 4-119
Good Materials Engineering Will Satisfy Customers, Yield Profits, by Oliver G. Saunders 4-115
How Engineers Contribute to Management, by Quentin W. Wiest 4-7
Judge Materials Engineering by Its Contribution to Profitability, by Newton N. Sacks 4-109
Materials Engineering Should Not Report to Any Group It Serves, by Elihu F. Bradley 4-120
Organization Stresses Interaction Between Science and Engineering, by John C. R. Kelly 4-127
Role of Materials Engineer Ranges From Scientist to Engineer, by Richard W. Hanzel 4-122
Sign-Off of Drawings Is Enforcement Function, by Robert P. Olsen 4-123
Success Hinges Largely on Capability of People, by Sam M. Jacobs 4-118
Try to Understand Problem, Then Solve It Only Once, by William L. Mitchell 4-116
We Must Keep Up With Advances and Take Advantage of Them Quickly, by Joseph A. Cameron 4-111
You Must Sell Your Services to All Plant Departments, by Mark G. Morris 4-126

Metallographic Exhibit
Dislocation Growth in Annealed Aluminum 6-96

Metallography
High Temperature Microscopy Helps Steel Researchers, by Karl H. Pichler and Alfred E. Kulmburg 2-177

Metallography, specimen preparation
Automating a Mounting Press, by Douglas V. Badger and Raymond O. Sochaski 6-121
Mounting Metallographic Specimens for Edge Retention, by Arthur E. Calabra 1-103
Two New Metallographic Reagents, by Emanuel Beraha 3-135

Molds
A Copper Alloy for Glass Molds, by Irving B. Elman 2-108

Molybdenum
Brazing Molybdenum and Zircon Sensor Components, by Robert E. Curran and Lewis I. Mendelsohn 6-94

National Metal Congress
Products, Processes, People . . . at the Metal Show 6-7

Nickel alloys
Fasteners for Cryogenic Applications, by Edward F. Gowen, Jr., and James J. Glackin 1-76
Forging and Solution Treating Alloy 718, by Donald M. Gadsby 6-85

Nitriding
From Europe Comes a Group of Well-Tried Cr-Mo and Cr-Mo-V Nitriding Steels, by John Erler 6-104

Nondestructive testing
NDT Assures Quality of Auto Parts, by Donald W. Pontius 4-183
Nondestructive Testing of Welds, by Warren J. McGonnagle *(d)* 1-124

Numerical control
What Ford Plans for . . . Numerically Controlled Die Machining, by George Pascoe 2-56

Oxidation resistance
Oxidation Resistant Structural Metals for High Temperature Applications, by Irving Machlin and Charles M. Gilmore 3-101

Oxide tools
Machining With Oxide Tooling, by Philip D. Arnold and Raymond D. Burns *(d)* ..2-148

Painting
Economy in Painting 4-208

Pipe
Making Steel Pipe by Stretch Reduction, by Carl R. Weymueller 6-135

Plastics
Joining Plastics, by W. D. Harris *(d)* 6-147
New Applications Key to Future of Polyolefin Plastics *(tn)* 1-9

***(cp)* Critical Point; *(d)* Digest; *(ds)* Data Sheet; *(sr)* Short Runs; *(tn)* Technical News**

Reinforced Fiber Composites in Springs, by Benjamin Posniak 3-81
Tests for Selecting Plastics, by Robert L. Bergen, Jr. 5-107

Plastics, ABS
Ford's Approach to Specifications for Plastics, by Travis H. Meister 4-206
Specifications for Plastic Parts in Automobiles, by Robert E. Skronek 4-203

Plastics, urethane
Urethane Die Helps Form Heavy Sheet, by Howard S. Achler 2-115

Plating, mechanical
Plating Springs Mechanically 1-75

Powder metal compacts
Evaluating Properties of Powder Iron Compacts by Sonic Tests, by Robert H. Brockelman 1-95

Pressure vessels
Pressure Vessels for the Apollo Spacecraft, by Lawrence J. Korb and Albert M. Krainess 3-93

Radioisotopes
Radioisotopes and Their Use, by J. W. Haffner *(d)* 1-135

Reinforced plastics
Reinforced Fiber Composites in Springs, by Benjamin Posniak 3-81

Residual stresses
Control of Residual Stresses in Hollow Aluminum Forgings, by Richard S. Barker and G. Keith Turnbull 5-60

Resistance heating
Resistance Heating Raises Forging Economy *(sr)* 1-100

Resistance welding
High Frequency Resistance Welding . . . a Way to High Speed Production, by Wallace C. Rudd 4-239
Resistance Method Welds 3000 Heating Elements an Hour *(sr)* 5-104

Salt baths
A Salt Bath System for Making Spring Bars, by William A. Curtis 6-97

Sheet
Rating the Formability of Sheet Metal, by Stuart P. Keeler 4-148

Shot peening
Shot Peened Gears, by J. C. Straub *(d)*....3-180

Single Crystals
A Breakthrough in Making Turbine Components . . . Directional Solidification and Single Crystals, by Barry J. Piearcey and Francis L. VerSnyder 5-66

Solidification
A Breakthrough in Making Turbine Components . . . Direct Solidification and Single Crystals, by Barry L. Piearcey and Francis L. VerSnyder 5-66

Spacecraft
Pressure Vessels for the Apollo Spacecraft, by Lawrence J. Korb and Albert M. Krainess 3-93

Specifications
Classification and Selection of Tool Steels *(ds)* 2-79
Ford's Approach to Specifications for Plastics, by Travis H. Meister 4-206
Specifications for Plastic Parts in Automobiles, by Robert E. Skronek 4-203

Spheroidizing
Direct Current Plasma . . . a New Spheroidizing Process, by Charles C. Potter 5-127

Springs
Hydrogen Embrittlement in Springs, by James H. Maker 1-73
Plating Springs Mechanically 1-75
Reinforced Fiber Composites in Springs, by Benjamin Posniak 3-81
What to Look for in Spring Wire, by Ronald D. Crooks 6-89

Stainless steels
Alloys for Mach 3 Aircraft *(d)* 1-145
Ductility of Metastable Austenitic Stainless Steel, by J. P. Bressanelli and A. Moskowitz *(d)* 5-154
Eleven Years of Creep Tests, by Alfred Keller 1-69
How Uranium Affects Corrosion of Resulfurized Stainlesses, by Gregory J. Biefer and William M. Crawford 6-119
Ice . . . Snow . . . Salt . . . and Slag . . . How Stainless Steel Auto Trim Resists Corrosion, by Donald R. Zaremski 3-71
Progress in the Battle With Corrosion of Automobiles, by G. Fred Bush 6-56
Surface Treatments Extend Life of Stainless and Aluminum Auto Trim *(tn)* 1-9
What Columbium Does to Type 410 Stainless Steel by Harry Tanczyn 5-101

Steelmaking
BOF + CC = High Production, by Carl R. Weymueller 5-119
Melting Practice Is More Important Than Composition, by Harry W. McQuaid 4-223

Steels
The Best Electroplate for Zinc and Steel, by Charles L. Faust and William H. Safranek 4-154
From Europe Comes a Group of Well-Tried Cr-Mo and Cr-Mo-V Nitriding Steels, by John Erler 6-104
Heat Treating for Better Machining, by Clifford J. Moody and George Felbaum..4-129
Heat Treatment . . . A Vital Factor in Machinability, by Norman Zlatin and John Christopher 2-105
Making Steel Pipe by Stretch Reduction, by Carl R. Weymueller 6-135
Metal Flow in Steel Forgings, by John A. Schey, Francis A. Shunk and Paul W. Wallace 5-91
Progress in the Battle With Corrosion of Automobiles, by G. Fred Bush 6-56
Superplasticity in Steels, by Dietrich Oelschlagel and Volker Weiss *(d)* 5-148
Two Corrosion Resistant Steels From Japan, by Katsujiro Takehara, Masamichi Kowaka and Taishi Moroishi 5-111
Welding of A514 Plates Saves Weight, Cuts Size of Fabricated Girders *(tn)* 2-7
Welding . . . The Way to Hybrid Structures, by Robert L. Hickey and Robert W. Schultz 3-65

Steels, ausformed
Characteristics of Ausformed 12% Cr Steel, by G. T. Brown, A. J. Thomas and J. V. Hardy *(d)* 2-162
Strengthening Steels by Ausforming, by O. Johari and G. Thomas *(d)* 5-150
Using Ausformed Steels for Tools, by Yeshwant P. Telang and Robert Clark.. 2-87

Steels, boron
How Caterpillar Uses Boron Steels, interview with Thomas H. Spencer 5-76
Retaining the Hardening Effect of Boron in Steels, by George F. Melloy and John C. Russ 5-82

Steels, continuously cast
Using Continuously Cast Steels in Automobiles, by Rufus Easton and John W. Donaldson 1-113

Steels, maraging
Manganese in Maraging Steels, by William R. Patterson and Lee S. Richardson *(d)* 5-136
Maraging Steel in Tooling Applications, by Daniel H. Yates and John C. Hamaker, Jr. 2-75
Preventing Embrittlement in Cadmium Plated Maraging Steels, by Edward A. Lauchner and Robert E. Herfert 3-84

Strain gages
Protective Coatings for Strain Gages, by R. J. Whitehead *(d)* 3-182

Strip
Continuous Annealing of Copper Alloy Strip, by Walter D. France 3-129

Structural materials
Oxidation Resistant Structural Metals for High Temperature Applications, by Irving Machlin and Charles M. Gilmore..3-101

Surfacing
Percussion Welder Coats Tools With Carbides, by R. P. Wolgast and T. J. Crawford *(d)* 2-154

Titanium
Cracking in Welded Titanium Structures, by R. H. Ernst, D. N. Williams and H. R. Ogden *(d)* 3-170
Alloys for Mach 3 Aircraft *(d)* 1-145

Tool steels
Better Die Steels by Argon Degassing, by James K. McCauley 2-68
Better Materials Through Research, by Paul R. Borneman 2-63
Classification and Selection of Tool Steels *(ds)* 2-79
Cold Work Grades, by Roland E. Groethe 2-67
Decarburization-Free AISI A6 Expedites Tool Manufacture *(sr)* 2-113
Decarburization-Free Stock and Unconventional Alloys, by Joseph S. Pendleton, Jr. 2-73
Designing a High Speed Steel, by G. Steven, T. V. Philip and A. E. Nehrenberg *(d)* 1-146
Grades for Plastic and Die Casting Molds, by William Wilson 2-68
A Graphite Grade, by Nicholas Economos 2-70
Improved Extrusion Tooling, by Leonard G. Joseph 2-72
Maraging Steel in Tooling Applications, by Daniel H. Yates and John C. Hamaker, Jr. 2-75
New Instruments Aid Development, by Richard S. Cremisio 2-63
S7: A General Purpose Type, by James J. McCarthy 2-67
Specifying Needed Properties, by Russell H. Boettger 2-74
Steels for Closed Impression Dies, by Lloyd R. Cooper 2-71
Tools of the Future, by Frederick C. Holtz and Niranjan M. Parikh 2-117
Two Useful Steels, by Clarence T. Fletcher 2-66
Using Ausformed Steels for Tools, by Yeshwant P. Telang and Robert Clark.. 2-87
A View of the Future, by David P. Hughes 2-60
What Vacuum Melting Does for Tool Steels, by Basil T. Lanphier 2-91

Trucks
Ford's New Truck Turbine: Still a Prototype *(tn)* 5-7

Tubes
Drawing Tubes, by N. H. Polakowski and R. M. Mayfield *(d)* 3-168
Properties of 4130 Steel Tubes, by David L. Weigel 1-93

Tungsten
Plating Tungsten, by Christopher Marzano *(d)* 3-184

Turbines
A Breakthrough in Making Turbine Components . . . Directional Solidification and Single Crystals, by Barry J. Piearcey and Francis L. VerSnyder 5-66

Ultrasonic machining
Ultrasonic Machining, by W. Pentland and J. A. Ektermanis *(d)* 2-160

Vacuum melting
What Vacuum Melting Does for Tool Steels, by Basil T. Lanphier 2-91

Value engineering
Value Engineering . . . IH Makes It Work, by Carl H. Meile and John M. Kenny 4-170

Valves
Welding Solves Valve Fabrication Problem, by Alfred W. Chesterman and Peter M. Holl *(sr)* 1-99

Welding
Electronic Lead Welding With the Laser, by Robert J. Frick 3-91
Low Hydrogen, Iron Powder Electrodes Now Weld Vertical Down *(tn)* 1-7
Partial Vacuum . . . the Key to Production Electron Beam Welding, by John W. Meier 1-63
Welding of A514 Saves Weight, Cuts Size of Fabricated Girders *(tn)* 2-7
Welding . . . The Way to Hybrid Structures, by Robert L. Hickey and Robert W. Schultz 3-65
Welding Solves Valve Fabrication Problem, by Alfred W. Chesterman and Peter M. Holl *(sr)* 1-99
What You Can Do With Mechanized Arc Welding, by Neale E. Orrok 4-140

Welding electrodes
Guide for Selecting Mild Steel Arc Welding Electrodes, by Jerome E. Hinkel .....1-82; *(ds)* 1-86

Welds
Nondestructive Testing of Welds, by Warren J. McGonnagle *(d)* 1-124

Wire
Stronger Steel Wire, by V. K. Chandhok, A. Kasak and J. P. Hirth *(d)* 5-160
What to Look for in Spring Wire, by Ronald D. Crooks 6-89

Work hardening
A Simple Test for Work Hardening, by Herbert E. Peterson 1-79

Zinc
The Best Electroplate for Zinc and Steel, by Charles L. Faust and William H. Safranek 4-154

Zirconium oxide
Brazing Molybdenum and Zircon Sensor Components, by Robert E. Curran and Lewis I. Mendelsohn 6-94
